DETAILED ACTION

Remarks

1. Applicant's amendment dated 7/19/2007 is entered.

Allowable Subject Matter

5. Claims 1-5 are allowed.
6. The following is an examiner's statement of reasons for allowance:

The prior arts of record fail to teach or suggest in combination, the arrangement that **"at a transmitter end, rotating each data symbol in a predetermined initial sequence known to a receiver through a phase rotation factor specific for a type of modulation being used to thereby form rotated data symbols; at a receiver end, derotating the rotated data symbols through different phase rotation factors to generate a derotated sequence;"** in combination with **"forming a correlation function between the derotated sequence and the initial sequence based on an**

assumed temporal position of the initial sequence contained in a signal received at the receiver end for each phase rotation factor, wherein a temporal position of the initial sequence is known up to a certain accuracy; forming a summation of products between the derotated sequence and the initial sequence for individual moments in time from the correlation function, and squaring a magnitude of the summation to form squares; and comparing the squares of the magnitudes and determining therefrom a modulation type used at the transmitter end in order to form "*transmission and reception method in a digital telecommunications system*", as recited in claim 1, and some variation of wording as recited in claim 4, and further limitation of the respective dependent claims 2-3, and 5.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
